-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. Claims 1-7, 10, 11, 14-20, 21, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Agnew et al (WO 97/25206).

Agnew et al disclose a method for preparing relief image printing plates. The method comprises transferring electronically stored images to photocurable printing plates by employing an ink jet print head to deposit ink onto the photocurable layer coated onto a support. The plates are then flood exposed with UV radiation, developed, dried, then post exposed (see examples beginning on page 9). The composition described by the examples of the reference comprises hydroxy propyl cellulose, a photoinitiator, and solvents, as well as other conventional additives, thus meeting the instant claim limitations.

***Allowable Subject Matter***

3. Claims 8, 9, 12, 13, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare a screen by the method of the instant claims wherein the developing wash comprises sodium carbonate or comprises less than 20 % organic solvents, the coating is about 10-60 microns in thickness, or wherein the ink comprises carbon black.

Art Unit: 1752

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leenders et al (6,358, 668) and Thompson et al (6,341,856) are cited for their teachings of similar materials.
